

TO WHOM IT MAY CONCERN

RE: Training of Bulgarian Chief and Second Engineers in operation of high voltage installations and systems

Herewith Bulgarian Maritime Administration would like to inform all concerned regarding training of Bulgarian Chief and Second Engineers in operation of high voltage installations and systems, as follow:

- All Bulgarian Chief Engineers and Second Engineers who have Certificates of Competency issued with validity date beyond 31.12.2016 passed training course covering requirements of the STCW Code.
- The syllabi of the above mentioned training course covers topics as hazards associated with HV, composition of HV installations, measures to prevent accidents, operation of such installations and etc.
- Having in mind that all Chief and Second Engineers passed a.m. training course this Administration do not impose limitation "not valid on ships with HV installations".
- If a certain Administrations requests additional training and CoP for HV these persons have to pass additional indetail training course.

Sincerely,

capt. Zhivko Petrov
Executive Director, *Bulgarian Maritime Administration*
